SUMMARY

Experienced DevOps Engineer skilled in building robust CI/CD pipelines, automating development processes, and managing cloud infrastructure (AWS, Azure, GCP). Proficient in Docker, Kubernetes, and infrastructure as code. Collaborative team player adept at troubleshooting and fostering seamless collaboration between teams. Committed to staying updated with emerging technologies for innovative solutions.

SKILLS

Cloud Azure AWS GCP	IaC Terraform	Container Orchestration Kubernetes, AKS, Docker(Docker compose), Portainer	Dependency/Package Managers maven(mvn), Node npm
Linux Administration Installation, Configuration & Operations	Scripting - Python, bash scripting		CICD Tools Azure DevOps, Jenkins, Gitlab CI, AWS code, build, deploy
Windows System Administration Installation, Configuration & Operations	Networking Subnetting, Network configuration	VirtualBox Virtualization	
	Process & Tools JIRA	Source Code Management Git, Github, Bitbucket	Monitoring & Observability , Grafana, Prometheus, New Relic, AWS CloudWatch
Documentation, SOPs, Confluence			

PROFESSIONAL EXPERIENCE

Devops-Server Engineer

06/2022 – 06/2025

Techspace Solutions • Pune,
Maharashtra

Delmar project-

- Led end-to-end ETL (Extract, Transform, Load) development and management, implementing efficient data integration processes. Proficient in ETL tools, optimized workflows, and ensured data quality.
- Managed servers and databases, overseeing their configuration, optimization, and maintenance. Implemented robust security measures, ensuring data integrity and availability. Collaborated with cross-functional teams to troubleshoot issues, optimize performance, and ensure seamless operation. Adept at proactive monitoring and implementing best practices to enhance server and database efficiency.
- Database Migration – openERP database migration into the odoo14 ERP.
- ETL Develop & Management
- Tech Stack:

Cloud: AWS | **Scripting:** Python | **CI/CD:** Gitlab CI/CD | **Database:** PostgreSQL

FarmCloud project-

- Managing and maintaining application servers running both Windows and Linux operating systems.
- Orchestrating and overseeing the Kubernetes platform across multiple stages and environments, ensuring scalability and reliability.
- Implementing seamless deployment processes utilizing Concourse and Gitlab pipelines. Collaborating closely with cross-functional teams to achieve project objectives.
- Oversaw DNS infrastructure, managing registrations, configurations, and records for optimal performance and security. Implemented measures to prevent unauthorized access and collaborated with teams to align DNS with organizational needs.
- Managing Docker container with portanier
- Webserver Configuration for proxy with nginx, Add ssl from certbot.
- Tech Stack:
Cloud: AWS | **Infrastructure as Code (IaC):** Terraform | **Scripting:** Python | **CI/CD:** Gitlab CI/CD | **Platform:** Portianer | **Monitoring & Observability:** AWS Cloud Watch, New Relic | **User story tool:** Jira

Software Engineer -Devops Engineer
Intellore System Pvt Ltd • Pune, Maharashtra

6/2025 – present

- Designed and maintained Jenkins CI/CD pipelines for multiple enterprise projects, enabling automated and reliable deployments.
- Managed physical and virtual servers along with enterprise databases, ensuring performance, availability, and security.
- Developed Python automation scripts for database backups, audit log cleanup, and routine operational tasks.
- Implemented robust security and compliance measures to protect sensitive data in regulated environments.
- Built and maintained monitoring solutions using industry-standard tools for proactive issue detection.
- Designed enterprise-grade cloud architectures for banking and carbon commission organizations.
- Collaborated with cross-functional teams to troubleshoot issues and optimize system performance.

Tech Stack:
Cloud: AWS, Digital Ocean | **Scripting:** Python | **CI/CD:** Jenkins CI/CD | **Database:** Postgresql, MS Server, MongoDB | **Containerations:** docker
